

PrimeSupport

By Prime Diagnostics

training | support | assay optimization

From starters to experienced users in the field of plant health diagnostics, Prime Diagnostics offers 'state of the art' training with emphasis on improvement of the overall quality of new or existing laboratories.

Based on your preferences and requirements we offer support and training on the detection platforms that fits your laboratory. To assist with the transfer to a new lab setting we also provide customers with additional products and support. These products include general consumables and chemicals.

Prime Support offers support to

- Companies which want to start up their own plant health diagnostics laboratory.
- Companies with existing plant health diagnostics laboratories for training and improving skills.

Prime Support includes

- Training; On-site or at our Facilities in Wageningen*
- Support; On-site*
- Assay optimization
- Access to additional products

* Europe: On-site assay support for a period of one year. Rest of the world: On-site assay support for a period of one year but additional traveling costs will be charged.

Prime Diagnostics

Prime Diagnostics provides diagnostic solutions for existing and new market demands in the agricultural and ornamental sector. With and for our clients. We produce and market a wide range of high quality products in combination with extensive technical support. New products are developed in collaboration with renowned research groups and industrial partners. This is how we bridge the gap between research and market, and contribute to a worldwide production of healthy material.

You can find all of our products on our website:
